Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1618

Claims 1, 2 and 5-20 are presented for examination.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2 and 5-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over The European Patent Application 0 224 352.

The European Patent Application teaches the method of administering less than 20 microliters of an ophthalmic formulation in a spray of droplet forms. See Abstract. The above reference differs from the claimed invention in the droplet diameter and discharge velocity. It would have been obvious for a person skilled in the art to use the teaching of the above reference, considering that the determination of droplet size and discharge velocity is considered to be within the skill of artisan in the absence of evidence to the contrary.

One skilled in the art would have been motivated to employ the teaching of the above reference, since it relates to a pharmaceutical dosage in a spray droplet form for treating ophthalmic disorders. The above reference makes clear that the drug has been delivered at the proper dosage and the intended treatment has been accomplished. The determination of droplet size or the discharge velocity is considered to be within the skill of artisan in the absence of evidence to the contrary. There is no evidence of record to demonstrate the advantage of the claimed dosage form over any other dosage

form which has been administered in a droplet spray form. Thus, for the above reasons claims 1, 2 and 5-20 are properly rejected under 35 U.S.C. 103.
